THE PART NOBODY EXPLAINS

october 15.

the state's backup fire policy goes up.

the california FAIR plan is what you get when no regular company will cover the house. on october 15 it rises 29.1% on average... **weighted to wildfire, so hillsides move a lot more.**

01 · WHO IT HITS

29.1%

is the average. hillsides, canyons and
foothills can move far more.

the *valley* *floor.*

most homes down here still get a regular company. get the real quote anyway... it's part of your payment, and i'd rather you see it on a tuesday than once we're in escrow with the clock running.

03 · THE DATE DETAIL

the day your policy starts decides your rate.

STARTS BEFORE OCT 15

generally today's
rate, for the whole
term.

STARTS ON OR AFTER

the new rate, from
day one.

closing anywhere near mid-october? that's a call to your
insurance broker **this week, not next month.**

04 · WHAT IT ACTUALLY COVERS

fire only.

the backup policy covers fire. you add a second policy for theft, water and liability. together they usually cost well above a regular one... **which is why the quote comes first now.**

BACKUP + SECOND POLICY = THE REAL NUMBER
