

the vehicles, with the mechanism attached

Five storytelling structures from the measured pool, each with its mechanism - why it holds attention, how it dies in unskilled hands, and what must be true for it to transfer to his real constraints. Three test picks close it: two proven pairs, one labeled bet.

copying winners without the mechanism is cargo cult

THE ANTI-CONFOUNDING LAYER

A format is two things layered: the storytelling structure - how the spoken words are organized - and the visual layout - how it is shot. Copy the layer that transfers.

Raw multiples cannot tell you which layer that is. Sabri's 14.1x rides a 504K channel, foundr's 15.9x rides a half-billion-dollar guest, and the 64.2x ceiling is one channel's nineteen-year franchise. So every structure carries a mechanism card: why it holds attention, how it dies in unskilled hands, and what must be true for it to survive the jump to this operator's real recording window - a stay-at-home dad's workday, one to three hours in naptime blocks, phone-first.

Format hunting is finite. Test three, crown one or two heroes by batch three, then reps.

S1 The Compression Promise - promise-debt plus ranked-completion pull. 5 rows, median 10.8x

'Give Me 27 Minutes and I'll Make You Disgustingly Good at Digital Marketing' - 201K, 14.1x, 2026-07-31. Failure mode: promise bigger than payload reads as betrayal

'Amazon Just Lost Control Of Shopping!' - 1.4M, 64.2x, 2026-04-28; transcript shows the beat order: event number, why the giant is scared, what it means for you, the move

[@mywifequitherjob ↗](#)**S3 The Witness - possibility witness; the scar makes the outcome credible. 7 rows, median 5.7x**

Quad Lock exit interview - 39K, 15.9x, 2026-07-30: 'no investors, no playbook, just an idea.' Confound: celebrity-guest effect; the mechanism transfers, the guest list does not

TRY THESE 3 FIRST

the test set: two proven pairs, one bet

Recipes at the operator's real constraint level: phone, natural light, naptime blocks, spoken-first.

01 **Pick 1 - The Claim Ladder (Compression x Talking head + receipts)**

Why: the pool's most reliable education vehicle (14.1x specimen), and his payloads are enumerable. Hook: "Give me four minutes and you'll know the six claims your supplement brand can legally make. Number one costs most brands \$53,088 to learn." Do: voice memo first, one session, a 45-90s cut and a 3-5min cut - 60-90 minutes all-in. Slots 1-2

02 **Pick 2 - The Regulatory News-Jack (Shift Analysis x Talking head)**

Why: the pool's current wave (64.2x ceiling) pointed at the one beat nobody claims. Hook: "Last week the FTC sent 14 warning letters to supplement brands. One sentence in letter #6 should change your next launch." Do: 20-minute Monday sweep of FTC releases, FDA letters, and platform health policy; publish inside 24-48 hours. Slots 5-6

03 **Pick 3 - The Counter Consult (self-witness x paper prop) - THE labeled bet**

Why: nobody in-pool runs self-witness monologue; one bet allowed, this is it. Hook: "This is the claim-safety sheet we run before any supplement ad ships. Three columns. The middle one saves accounts." Do: one counter story per video from the 18-year bank, printed one-pager in hand, 45-75 seconds. Fallback written: pitch the stories to the operator roundtables as a guest. Slots 3-4, plus the chaos slot

04 **After 2-3 batches: crown 1-2 heroes, stop testing, start reps**

The hero-format rule; the tracker's what-counts-as-working thresholds make the call, not the vibes

the honest ceiling

Recording and delivery cannot be automated by any of this. The recipes are model-and-mimic: angles, distance, pacing, where the text hook sits. The last mile is him on camera, and the spoken-first pipeline exists because that is where his quality lives. Scope limits: the matrix measures YouTube only (TikTok/Instagram coverage: none); his LinkedIn carousel and DM formats sit outside this artifact's evidence.
