

Where the niche is crowded, and where it is not

Eight positioning dimensions (wedge = one dimension of how a channel competes).

Shading = how crowded: solid ink is saturated, pale dashed is open. ★ marks the wedges the verdict recommends claiming. Bubbles are channels, sized by subscribers, placed in the wedge they most define.

VERDICT: OPEN

1 · WHAT THIS EVEN IS

What watching the channel makes you believe about your problem. The deepest wedge: lanes are usually beliefs nobody installs, not topics nobody covers.

2 · THE MENU OF OPTIONS

'You are the constraint' · 'Marketing is learnable psychology' · 'The new tool changes everything' · 'Platform chaos is opportunity' · 'The journey is the proof' · 'Starting is easy' · 'Measure better' · 'Decide the message first'

3 · WHAT YOUR NICHE IS DOING (RECEIPTED SCOREBOARD)

OPTION	OCCUPANCY	WHO / RECEIPT	VERDICT
Adopt-the-mechanism (5 dialects)	12 of 12	every channel, incl. Supliful's 33.2× launch-is-easy rows	crowded
ROAS distrust (pre-tilled ground)	2 of 12	MO (Haus episode), CTC	contested
Decision-before-mechanism	0 of 12	nobody installs it	open

4 · THE WHITE SPACE

The unmade-decision belief: 'your growth problem is an unmade message decision; in a regulated category the defensible claim is the growth asset.'

5 · WHAT IT MEANS FOR FARRICE

Claim the empty belief slot with the Fix Aisle: each week, take the mechanism the niche is hyping, grant what it does, then name the decision it cannot make. The niche writes the prompt weekly — Supliful's own winners are busy manufacturing the sameness his offer fixes.

THE TRAP THIS WHEEL INVITES: reading "open" as "guaranteed demand." Open means nobody measured is there; it does not prove buyers want it. Zero videos is unclaimed, many low-outlier videos is a graveyard, and an open wedge has zero demand evidence by definition. Batches 1–3 are the probe; the bullseye overlay decides in dollars.
