4. Production Workflow

This refines the workflow outlined in the *Content Calendar* document, incorporating the formulas and components.

1. **Weekly Planning (Friday - 1 hour):**

- Review performance metrics from the previous week (See Section 5). Which themes/formulas resonated?
- Consult the Monthly Content Theme (from Content Calendar doc).
- Select ICP focus for key posts (rotate focus or align with ad performance).
- Choose Content Formulas (mix of types: Problem, Value, Story, etc.) for LinkedIn (3-5 posts) and optionally Instagram (2-3 posts + Story ideas).
- Outline key message/angle for each post. Identify necessary Modular Components (Hooks, Pains, CTAs).

2. **Content Creation (Weekend - 2-3 hours):**

- **Write Copy:** Draft posts using selected Formulas and Components. Tailor language to the target ICP and channel (LinkedIn vs. IG).
- **Create/Source Visuals:** Design graphics (Canva), select photos, record short videos (batch record if possible). Ensure visuals align with the message and channel.
- **Review & Refine:** Check for clarity, tone, grammar, and alignment with Coach Cooz's voice and brand. Ensure CTAs are clear.

3. **Scheduling (Sunday - 30 mins):**

- Use a scheduling tool (e.g., Buffer free plan, Meta Business Suite) or schedule natively on LinkedIn/Instagram.
- Schedule posts for optimal times (referencing Content Calendar doc recommendations, adjust based on own analytics).

4. **Daily Engagement (Daily - 30 mins):**

- Monitor notifications.
- Respond to comments and DMs promptly and authentically.

- Engage with content from relevant connections/prospects in the feed.

5. Mid-Week Check (Wednesday - 15-30 mins):

- Review engagement on early-week posts.
- Check ad performance briefly (pacing, initial CPL). Make minor adjustments if necessary (e.g., respond to a trending topic if relevant).

5. Measurement Framework (Content Focus)

This adapts the *Performance Metrics* plan to specifically evaluate content effectiveness.

A. Key Content Performance Indicators (KPIs)

- **LinkedIn Ads (Tracked via LinkedIn Campaign Manager):**
 - **CTR (Click-Through Rate):** % of impressions resulting in clicks. *Indicates hook/creative effectiveness.* Target: >0.8%.
 - **CPL (Cost Per Lead):** Ad spend / Leads generated. *Indicates overall ad effectiveness (message + targeting).* Target: < \$100-150 (optimize lower).
 - **CVR (Conversion Rate - Clicks to Leads):** % of clicks converting to leads. *Indicates ad message & landing page/form effectiveness.* Target: >12%.
 - **Relevance Score (if available):** LinkedIn's assessment. *Indicates ad quality & targeting alignment.* Target: 7+.
 - **Analysis:** Compare performance across ads using different Formulas/Components targeting the *same* persona. Which hooks/pain points drive lower CPL for Michael?
- **LinkedIn Organic (Tracked via LinkedIn Analytics):**
 - **Engagement Rate:** (Likes + Comments + Shares + Clicks) / Impressions. *Indicates resonance and value.* Target: >3%.
 - **Reach/Impressions:** How many people see the content.
 - **Comments:** Qualitative feedback, engagement depth.
 - **Profile Views/Connection Requests (from posts):** Indicates content driving interest in Coach Cooz.

- *Analysis*: Track which Content Formulas (B1-B5) and themes generate the highest engagement rate. Which posts lead to profile views or DMs mentioning the content?
- **Instagram Organic (Tracked via Instagram Insights):**
 - **Engagement Rate**: (Likes + Comments + Saves + Shares) / Reach.
 - **Reach/Impressions.**
 - **Story Views & Interactions (Replies, Poll Votes, Sticker Taps).**
 - **Profile Visits/Website Taps (from Bio Link).**
 - *Analysis*: Which visual styles (Reels, Carousels, Graphics) and topics perform best? Which Stories drive interaction or link clicks?
- **Cross-Channel:**
 - **Lead Source Tracking (Manual/CRM)**: Ask leads "How did you hear about us?". Track if specific content pieces are mentioned.
 - **Discovery Call Quality**: Correlate lead source/initial content interaction with lead quality and conversion rate to client. Do leads from "Problem Validation" posts convert better than those from "Value Tip" posts?

B. Content Optimization Process

- **Weekly Review (incorporate into Production Workflow Planning):**
 - Identify top 1-2 performing organic posts (by engagement rate/reach). What Formula/Topic/Hook worked?
 - Identify lowest 1-2 performing organic posts. Why might they have underperformed?
 - Review ad CTR and CPL by ad variation. Pause ads significantly underperforming targets (e.g., CTR <0.4%).
 - *Decision*: Double down on successful formulas/themes. Rework or drop underperforming approaches. Allocate more ad budget to winning creative variations.
- **Monthly Content Deep Dive:**

- Analyze trends across the month. Which core messaging pillar (Control, Breakthrough, Balance) generated the most engagement/leads?
 - Which persona-specific content performed best overall?
 - Review qualitative feedback (comments, DMs, discovery call mentions).
 - *Decision:* Refine the content calendar themes for the next month based on data. Plan A/B tests for specific ad components (e.g., test 2 hooks for Jennifer). Refresh underperforming organic content formulas.
- **Feedback Loop Integration:**
 - Use insights from Discovery Calls (common questions, objections, language used by prospects) to refine Pain Point components and create new content addressing these directly.
 - Use feedback from new clients ("What convinced you?") to identify high-impact messaging for Social Proof content.
-

Recommendations for Deployment:

1. **Platform Focus:** Allocate the majority of the budget (\$20-\$40/day) to LinkedIn due to stronger ICP alignment for professionals. Use a smaller portion (\$5-\$10/day) for Instagram awareness/retargeting if desired.
 2. **Targeting:** Use LinkedIn's precise targeting (Job Titles, Seniority, Industry, Location - LA Metro) aligned with Michael, Jennifer, and Robert profiles. For Instagram, target interests related to professional development, fitness, personal growth, and lookalike audiences if pixel data exists.
 3. **A/B Testing:**
 - **LinkedIn:** Start by testing 2-3 variations (e.g., Ad 1 vs Ad 2 vs Ad 4) against the core target audience. Monitor CPL and CTR closely. After 3-5 days, allocate more budget to the winner(s).
 - **Instagram:** Test different creative formats (Reel vs. Static/Carousel) and hooks. Monitor engagement and link clicks.
 4. **Landing Page:** Ensure the link leads to a clear, simple sign-up page for the challenge, reiterating the start date and benefits.
 5. **Timing:** Run ads starting today (April 28th) through May 4th, increasing urgency messages as May 5th approaches.

Implementation Notes:

- **Maintain Clarity:** While adding curiosity, ensure the core offer (Fitness Challenge, May 5th) and the CTA (Sign Up/Register) remain crystal clear.
- **Test Hooks:** A/B test the curiosity-driven headlines and opening lines rigorously, as these are crucial for grabbing attention.
- **Visual Alignment:** Ensure visuals strongly support the curiosity angle (e.g., a visual representing a question mark, a broken wall for plateaus, gears meshing for integration).
- **Landing Page:** The landing page should briefly acknowledge the curiosity point raised in the ad (e.g., "Ready to discover the real cost of waiting?") before clearly presenting the challenge details and sign-up.
