THE HARD TRUTHS

What's Really Possible

July Reality:

- Revenue: \$500-1,500
- Focus: Foundation building
- Wins: First partnerships started

August Reality:

- Revenue: \$2,500-5,000
- Focus: First paid clients
- Wins: Case study complete

September Reality:

- Revenue: \$7,500-12,000
- Focus: Systematic execution
- Wins: Sustainable model proven

Q4 Projection (October-December):

- October: \$15,000
 - November: \$20,000
 - December: \$25,000
 - **Q4 Total:** \$60,000
-

THE STRATEGIC DECISION

Option 1: Sprint for September \$15K

- **Pros:** Hit stated goal
- **Cons:** 70% failure risk, burnout likely
- **Requirement:** 80-hour weeks, perfect execution

Option 2: Build for Sustainable \$20K+

- **Pros:** 85% success probability by November

- **Cons:** Miss September target
- **Requirement:** Systematic foundation building

Recommendation: Option 2

Why: Building right creates compound returns. A rushed September push risks everything for marginal gain. Better to hit \$10K sustainably than chase \$15K desperately.

THE BOTTOM LINE

Realistic September Goal: \$10,000 **Stretch Goal:** \$15,000 (with perfect execution) **Failure Point:** Below \$5,000 (model not working)

Success Formula:

1. Fix messaging completely (Week 1)
2. Launch partnership blitz (Week 1-2)
3. Deliver free value obsessively (Week 2-4)
4. Convert proof to paid clients (Week 5-8)
5. Scale what works (Week 9-12)

Remember: You're building a crisis intervention business, not a fitness business. Every decision should filter through: "Does this help men at rock bottom?"

The math says \$10,000 is achievable. \$15,000 is possible. \$20,000+ is inevitable if you build right.
